ABOUT

Solutions Architect and Technical Pre-Sales professional with a track record of accelerating complex sales cycles across the public and private sectors, combining Cloud (GCP), Generative AI and commercial strategy. I design and deliver PoCs and technical demos that engage C-Level stakeholders, and structure AI-driven commercial proposals and Account Plans that support deal progression.

Strong technical foundation in SUSE Linux, Rancher, Kubernetes, Docker, Python and SQL, complemented by a background in technical teaching and fluent bilingual communication.

CORE COMPETENCIES

Solution Architecture · Technical Pre-Sales · Proof of Concept (PoC) · C-Level Presentations · Google Cloud Platform · Generative AI · CRM (Salesforce) · Go-To-Market (GTM) · Pipeline Management · Kubernetes · SUSE Linux Enterprise · Rancher · Docker

PROFESSIONAL EXPERIENCE

Customer Engineer — Xertica.ai — Aug 2026 — Present
Brasília, DF · Hybrid

- Design, validate and present high-impact PoCs and executive demos to C-Level stakeholders, directly supporting purchase decisions.
- Manage the sales pipeline in Salesforce and build complex commercial proposals aligned with each client's needs.
- Structure AI-driven Account Plans, identifying expansion opportunities across strategic accounts.
- Contribute to the design and tactical execution of the Go-To-Market strategy for Generative AI solutions.
- Develop AI projects focused on direct social impact on the lives of Brazilians.

Solution Architect (Pre-Sales) — Acorp do Brasil — Jan 2026 — Aug 2026
São Paulo, SP · Remote

- Designed technical solutions and supported customers throughout the evaluation and decision process.
- Built and delivered PoCs, demo labs and technical presentations.
- Created and maintained demo environments and demo centers used by partners and clients in technical validations.
- Supported certifications and technical enablement, strengthening the pre-sales team's capabilities.
- Occasionally acted as a Systems Engineer on technical analysis, troubleshooting and solution validation.

Solutions Architect (Pre-Sales) — SUSE — Jan 2024 — Jan 2026
Brazil · Remote

- Contributed to solution architecture documentation across more than 5 projects, accelerating onboarding of new engineers and improving technical alignment.
- Developed 3 proof-of-concept projects to validate architectural decisions, ensuring alignment with SUSE's standards and best practices.
- Took part in evaluating more than 10 technologies and tools, producing technical comparisons that supported pre-sales decisions.
- Assisted in the evaluation and selection of appropriate technologies for each implementation.
- Completed official SUSE certifications (SLES, Rancher Prime/Kubernetes and SUSE Manager).

Data Engineer — PGFN — Attorney General's Office for the National Treasury — Jul 2023 — Jan 2024
Brasília, DF · On-site

- Automated data pipelines with Python and SQL, reducing collection and processing time by approximately 70%.
- Implemented autonomous extraction routines, saving around 15 hours of manual work per week.
- Developed web scraping scripts to extract and process large volumes of data with Selenium, BeautifulSoup and Regex.
- Processed data using MySQL, Apache Hive and Spark.

Course Coordinator & Tutoring Representative — UniCEUB — Centro Universitário de Brasília — Jan 2022 — Jan 2026

Brasília, DF · Hybrid

Crash Course Coordinator (Jun 2023 — Jan 2026) · Workshop Instructor (Feb 2023 — Jun 2023) · Teaching Assistant Tutor (Jun 2022 — Feb 2023) · Computer Laboratory Monitor (Jan 2022 — Jun 2022)

- Trained more than 90 students across technical courses and workshops.
- Delivered over 700 hours of one-on-one tutoring in programming, logic, Linux and web development.
- Coordinated workshops and crash courses in Linux Essentials, Python, HTML/CSS and C, and delivered technical presentations.
- Led a Git workshop focused on preparing students for the technology job market.
